Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Oral Training Lessons in Natural Science and General Knowledge: Embracing the Subjects of Astronomy, Anatomy, Physiology, Chemistry, Mathematical Geography, Natural Philosophy, the Arts, History, Development of Words, Etc., Intended for Teachers of Public Schools and Also for Private Instruction It need hardly be stated that the Author s object in this work is to present a concise but comprehensive course in the most important Natural Sciences to those who have not the means of purchasing separate works upon each, and who may not have had the opportunity of acquiring a knowledge of them during their school-days. But this is not the only object. The information is all arranged in the probable course that a lesson would take, were the teacher imparting it in the school-room. Not only is the material furnished, and arranged in this manner, but the process of developing new words and applying them has also received particular care and attention. The mode of treating inattentive or idle pupils is also shown during the course of the lesson. By a careful previous study of the lesson any Teacher of ordinary ability may very successfully give either of the lessons of the course; but if preferred the book may be judiciously used in the hands of the Teacher as a guide. Perhaps none of the lessons will take the exact course here given. You must inevitably follow where the pupils answers lead you; but you must at the same time lead their thoughts in the general direction indicated. The six prominent features of these lessons are: 1st, Elliptical Answers given by all in concert. 2d, Individual Questions and Answers. About the Publisher Forgotten Books...
