Financialization. The power of the financial market and its actors

By Pablo Bernardino Sanchez Arias

GRIN Verlag Gmbh Jul 2014, 2014. Taschenbuch. Book Condition: Neu. 211x32x12 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2014 in the subject Politics - International Politics - Topic: Globalization, Political Economics, grade: 2.3, University of Erfurt, course: International Relations, language: English, abstract: Financialization is a process by which financial markets, financial institutions and its actors have gained a major influence, or indeed Hegemony, over economic policies, economic outcomes, and the social field. It mainly impacts the behavior between financial sector and real sector, promoting the first, through numerous phenomena: Deregulation of the financial sector and the development of new instruments, capital flow liberalization as well as exchange rate instability, the emergence of new powerful institutional investors, shareholder-Value-orientation and changes in the enterprises corporate governance, an easier access to credits for the underbanked social groups, a higher level of real interest rate in comparison to the post-war period. Income transfer from the real sector to the financial sector as well as an increased debt, increasing income inequality and wage stagnation are among financialization's consequences. Additionally, the financial process operates through changes in the operation of financial markets as well...
