

## Curiosities of Glass Making; With Details of the Processes and Productions of Ancient and Modern Ornamental Glass Manufacture

Filesize: 2.33 MB

### ***Reviews***

*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1849 edition. Excerpt: . view of the annealing arches, showing three sets of pans heating each with a separate fire, wita the same cylindrical brick arches and cast-iron doors A lear is the term given to an arch, or oven, open at both ends. Each lear has a small furnace at the receiving end or side nearest the large Glass furnace; the hot end may be termed the receiving end, and the cooler the discharging end; the latter terminates with a chimney, and the hot end is kept at a temperature just short of a melting heat. The caloric is sustained by oven-burnt coke, which imparts, decidedly, the most regular heat for annealing, and is the freest from smoke, the carbon of coal smoke being generally injurious to the colour of the Glass. There are from two to four of these semi-cylindrical arches, built side by side; on the floors of these are placed iron pans to receive the manufactured goods, which travel upon a miniature railroad gradually downward from the heated to the cooler end, a distance of about sixty feet: one-fourth of the length of this distance is arched, and leads into an air-tight receiving or sorting room, from which the goods are ultimately removed. If there be two or more lears, or arches, in one house, there should be various degrees of heat in each; the highest being intended for strong goods for cutting, the medium for the ordinary run of table Glass, and...
