Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: .are limited to the neighbourhood of the lateral branch, becoming normal at a greater distance from it. The puzzling structure of *Lyginodendron anomalum*, which is only known as a fragment of calcified wood from the volcanic ash of Arran, was correctly interpreted by Williamson, who says (i.e., p. 352): These cell-masses are in fact huge medullary rays of a most extraordinary form. No stem, however, has hitherto been known, presenting the same peculiarity in so extreme a degree. Mr Seward, who observed a somewhat similar enlargement of the rays near the outgoing leaf-trace, in the stem named by him *Lyginodendron robustum*, made the following suggestion: Such a comparison suggests the probability that the shorter and broader medullary rays and the more irregular course of the tracheides may not represent the normal character of the stem from which the Arran fragment was obtained, but that these appearances may be the result of some disturbing influence in the secondary wood. In the specimen of *Pitys primteva* just described, we have a striking confirmation of Mr Seward's suggestion. Under the disturbing influence of the presence of a lateral branch, the wood of this plant assumes the same peculiar structure which characterises the Arran fragment, while elsewhere retaining the ordinary organisation. In other respects, and notably in the pitting of the tracheides, there is a close, though not an absolutely exact agreement between the wood of *Pitys primasva* and that of the Arran fossil, which is of similar Lower...
